

GREEN HORIZON BIOWASTE

PRIVATE LIMITED · WASTE TO ENERGY

CAPABILITY PROFILE · 2026

Industrial waste, handled on record.

Pan-India collection and trade of plastic, metal, hazardous, e-waste and used-oil streams — with witnessed weighment, category-wise rates in writing, and documentation that survives an audit.

WHAT WE DO

- Plastic waste management
- Hazardous waste collection & channelisation
- Used & waste oil management
- EPR documentation & compliance support
- Organic & agri-waste for Compressed Biogas (CBG)
- Metal scrap — ferrous & non-ferrous
- E-waste management
- Recycled granules, flakes & chips
- Export & import services
- Paper, OCC & dry-waste buying

Who we are

Green Horizon Biowaste Private Limited is a Meerut-based industrial waste management company. We buy plastic, metal and dry-waste scrap directly from the units that generate it, collect and channelise regulated streams to authorised handlers, supply recycled granules and flakes back into manufacturing, and carry the documentation trail that regulators, auditors and buyers all ask for.

Most industrial scrap in India still moves through informal aggregator networks — cash deals, no weighbridge, no paper trail. We were built as the alternative: a company you can name on your EPR return, your audit file and your vendor register.

Four commitments on every lifting

Witnessed weighment

No load is priced off a claimed weight — weighed with your representative present or a load sheet countersigned on site.

Category-wise rates

A mixed load holds several differently priced materials. Each category is priced on its own.

Rate in writing

Rates are confirmed before the truck leaves your gate, never renegotiated at the weighbridge.

Payment date kept

The payment date is agreed at quotation and tracked in our ERP, not left to memory.

What we buy

Our buying register is priced category by category. HSN groups below are indicative — confirm the exact heading for your invoice with your GST consultant.

MATERIAL	HSN GROUP	WHAT QUALIFIES
PLASTICS		
PET	39	Bottle scrap, jars, preforms — clear & colour, baled or loose
HDPE	3901	Milk pouches, drums, crates, rigid containers
LDPE / LLDPE	3901	Stretch film, liners, milky & printed film
PP	3902	Woven sacks, bori, rigid PP, moulded rejects
PS	3903	Rigid PS, thermocol / EPS
Multilayer (MLP)	3915	Laminates, pouches, flexible packaging waste
METALS		
Ferrous scrap	7204	Turnings, borings, sheet cuttings, structural offcuts
Copper	7404	Wire, sheet, utensil scrap — segregated grades
Aluminium	7602	Sheet, extrusion, utensil, radiator scrap
Brass & zinc	7404/7902	Turnings, sheet cuttings, casting rejects
PAPER & DRY WASTE		
Paper & OCC	4707	Corrugated cartons, raddi, office paper
Industrial dry waste	—	Process reject, packaging waste, general dry scrap

Regulated streams

Hazardous waste · E-waste · Used & waste oil

Collected in sealed drums or covered containers, moved on a manifest, and delivered only to recyclers, re-refiners or TSDFs holding the relevant CPCB authorisation — with the recycling or disposal certificate returned to you for your EPR return and audit file. GHBPL's own CPCB authorisation applications for these categories are in process; until granted, each load moves under an authorised handler's registration.

What we supply

rPP granules

Natural & coloured, injection and extrusion grade

rHDPE granules

Blow-moulding and injection grade

rLLDPE granules

Film grade for non-critical packaging

PET flake & chip

Hot-washed, colour-sorted, sold by grade

How we work

01

Enquiry & site details

You share material categories, approximate monthly volume and location.

02

Site assessment

We walk your scrap corner and list categories, contamination share and handling constraints.

03

Category-wise valuation

A rate per category, confirmed in writing before pickup.

04

Scheduled lifting

Standing schedule or on-call, depending on your volume.

05

Witnessed weighment

Weighed with your representative present or the load sheet countersigned on site.

06

Documentation & payment

Signed load sheet, GST invoice and payment on the agreed date, tracked in our ERP.

Where we stand

We handle regulated streams through authorised partners and we say so. GHBPL's own CPCB authorisation applications for hazardous waste, e-waste and used oil are in process. What we buy, weigh and move on our own account is non-hazardous industrial and commercial scrap. PET flake is sold by its actual grade and is not represented as food-contact grade.
